

GlidePath Retirement 2060

Morningstar Category

Target-Date 2060+

Investment Objective & Strategy

The Fund utilizes both actively and passively managed investments and allocates its assets across a broad range of underlying strategies, including global equities, broadly diversified fixed income, and private real estate. The strategies are managed by a diverse group of investment management organizations, each with a demonstrated expertise in their area of focus.

The Callan GlidePath® 2060 Fund seeks to achieve a balance of long-term capital growth, inflation protection, and capital preservation by investing in a diversified mix of asset classes and investment styles that becomes increasingly conservative over time.

Operations and Management

Initial Inception Date 06-03-13
 Management Company Callan LLC
 Issuer Wilmington Trust, N.A.

Volatility Analysis

In the past, this investment has shown a relatively moderate range of price fluctuations relative to other investments. This investment may experience larger or smaller price declines or price increases depending on market conditions. Some of this risk may be offset by owning other investments with different portfolio makeups or investment strategies.

Notes

Each GlidePath Retirement fund (e.g. 2010, 2015, etc.) invests in the corresponding target date fund of the Callan GlidePath Series, a collective investment trust of Wilmington Trust, N.A. The Callan GlidePath Funds are not mutual funds. Rather, Wilmington Trust, N.A. has established a "group trust" within the meaning of IRS Revenue Ruling 81-100, as amended, which is managed by Callan LLC, a registered investment advisor. The group trusts are collective investment trusts exempt from registration under the Investment Company Act of 1940, as amended.

The year in the target date fund name refers to the approximate year when an investor in the fund would retire and leave the work force. The fund will gradually shift its emphasis from more aggressive investments to more conservative investments based on the target date. The strategy of the GlidePath Retirement funds translates into an equity allocation that is somewhat more aggressive in order to protect against longevity risk. The GlidePath Retirement funds' underlying investment allocations continue adjusting along the glide path for approximately twenty years beyond the named target date. The return of principal for the underlying funds in a target date fund is not guaranteed at any time, including on or after the target date. Although the target date funds are managed for investors on a projected retirement date time frame, the fund's allocation strategy does not guarantee that investors' retirement goals will be met and a target date fund should not be invested in based solely on age or retirement date. Unit price, principal value and return will vary and an investor may have a gain or loss when units are sold.

Disclosure

Investment options are subaccounts in an insurance company separate account maintained by United of Omaha Life Insurance Company for contracts issued in all states except New York, and by Companion Life Insurance Company for contracts issued in New York, that invests in the underlying mutual fund/collective trust investments or is managed by the specified investment manager. All funds may not be available as an investment option in a plan.

Composition Graph

The Long/Short/Net bar chart replaces the Composition pie chart when a fund invests in shorts and derivatives. The overall net percentage value of each investment class is displayed. A short is any security in which a negative position is taken where the portfolio manager looks to profit from falling prices. A derivative is any future, forward, option or swap contract that provides exposure to assets like stocks, bonds, or commodities. Derivatives are also used to manage risk or to act on a view about the economy.

Morningstar Style Box™

Morningstar Style Box™ The Morningstar Style Box reveals an investment choice's investment strategy as of the date noted on this report.

For equity funds the vertical axis shows the market capitalization of the long stocks owned and the horizontal axis shows investment style (value, blend, or growth).

For fixed-income funds, the vertical axis shows the credit quality of the long bonds owned and the horizontal axis shows interest rate sensitivity as measured by a bond's effective duration.

Morningstar seeks credit rating information from fund companies on a periodic basis (e.g., quarterly). In compiling credit rating information Morningstar accepts credit ratings reported by fund companies that have been issued by all Nationally Recognized Statistical Rating Organizations (NRSROs). For a list of all NRSROs, please visit <http://www.sec.gov/divisions/marketreg/ratingagency.htm>. Additionally, Morningstar accepts foreign credit ratings from widely recognized or registered rating agencies. If two rating organizations/agencies have rated a security, fund companies are to report the lower rating; if three or more organizations/agencies have rated a security, fund companies are to report the median rating, and in cases where there are more than two organization/agency ratings and a median rating does not exist, fund companies are to use the lower of the two middle ratings. PLEASE NOTE: Morningstar, Inc. is not itself an NRSRO nor does it issue a credit rating on the fund. An NRSRO or rating agency ratings can change from time-to-time.

For credit quality, Morningstar combines the credit rating information provided by the fund companies with an average default rate calculation to come up with a weighted-average credit quality. The weighted-average credit quality is currently a letter that roughly corresponds to the scale used by a leading NRSRO. Bond funds are assigned a style box placement of "low", "medium", or "high" based on their average credit quality. Funds with a low credit quality are

those whose weighted-average credit quality is determined to be less than "BBB-"; medium are those less than "AA-", but greater or equal to "BBB-"; and high are those with a weighted-average credit quality of "AA-" or higher. When classifying a bond portfolio, Morningstar first maps the NRSRO credit ratings of the underlying holdings to their respective default rates (as determined by Morningstar's analysis of actual historical default rates). Morningstar then averages these default rates to determine the average default rate for the entire bond fund. Finally, Morningstar maps this average default rate to its corresponding credit rating along a convex curve.

For interest-rate sensitivity, Morningstar obtains from fund companies the average effective duration. Generally, Morningstar classifies a fixed-income fund's interest-rate sensitivity based on the effective duration of the Morningstar Core Bond Index (MCBI), which is currently three years. The classification of Limited will be assigned to those funds whose average effective duration is between 25% to 75% of MCBI's average effective duration; funds whose average effective duration is between 75% to 125% of the MCBI will be classified as Moderate; and those that are at 125% or greater of the average effective duration of the MCBI will be classified as Extensive.

For municipal bond funds, Morningstar also obtains from fund companies the average effective duration. In these cases static breakpoints are utilized. These breakpoints are as follows: (i) Limited: 4.5 years or less; (ii) Moderate: more than 4.5 years but less than 7 years; and (iii) Extensive: more than 7 years. In addition, for non-US taxable and non-US domiciled fixed income funds static duration breakpoints are used: (i) Limited: less than or equal to 3.5 years; (ii) Moderate: greater than 3.5 and less than equal to 6 years; (iii) Extensive: greater than 6 years.

Annual Turnover Ratio

A proxy for how frequently a manager trades his or her portfolio.

Investment options are offered through a group variable annuity contract (Forms 902-GAQC-09, 903-GAQC-14, 903-GAQC-14 FL, 903-GAQC-14 MN, 903-GAQC-14 OR, 903-GAQC-14 TX, or state equivalent) underwritten by United of Omaha Life Insurance Company for contracts issued in all states except New York.
