A. Accounting Practices

The Company has prepared the accompanying statutory financial statements in conformity with accounting practices prescribed or permitted by the State of Nebraska Department of Insurance ("NDOI"). The state of Nebraska has adopted the National Association of Insurance Commissioners' ("NAIC") statutory accounting principles ("NAIC SAP") as the basis of its statutory accounting practices. The Director of the NDOI has the right to permit other specific practices that may deviate from NAIC SAP. The Company does not utilize any permitted practices however, there is an impact on its results of operations and surplus from the prescribed practices followed by its subsidiaries Companion and Omaha Re.

The following is a reconciliation of the Company's net income (loss) and capital and surplus between the practices prescribed or permitted by the NDOI and NAIC SAP as of and for the period ended March 31 and December 31:

	SSAP #	F/S Page	F/S Line #	2025	2024

B. Use of Estimates in the Preparation of the Financial Statements

No Change

C. Accounting Policy

The Company used the following accounting policies:

- (1) No Change
- (2) Bonds are stated at amortized cost using the effective yield method, except for certain bonds with an NAIC designation of 6, which are stated at lower of amortized cost or fair value.
- (3) - (5) No Change
- (6) Premiums and discounts on asset-backed securities are amortized using the prospective or retrospective method based on anticipated prepayments from the date of purchase. Changes in estimated cash flows due to changes in estimated prepayments are accounted for using the prospective method for impaired securities and securities valued based on an index, and the retrospective method for all other securities.
- (7) - (13) No Change

D. Going Concern

Management's evaluation of all known and reasonably knowable conditions and events for the Company, as of March 31, 2025, has concluded there are no substantial doubts about the entity's ability to continue as a going concern, or meet its obligations within one year of the financial statement's issuance date.

STATEMENT AS OF MARCH 31, 2025 OF THE United of Omaha Life Insurance Company

NOTES TO FINANCIAL STATEMENTS

Note 2 Accounting Changes and Corrections of Errors

In August 2023, the NAIC issued revisions to SSAP No. 26, Bonds, and SSAP No. 43, Asset-Backed Securities. The revised guidance updates the definition of a bond, revises the accounting and reporting for bonds, and updates various SSAPs to reflect the revised bond definition. See Note 21C for additional details regarding the impact on the Company's financial statements upon adoption of this guidance on January 1, 2025.

During 2025, the Company discovered an error in the prior year recording of capital distribution and capital call transactions related to an other than invested asset, resulting in a \$20,364,648 understatement of the prior year net investment income (Page 4, Line 3) and a \$20,364,648 overstatement of change in net unrealized capital gains (losses) (Page 4, Line 38), with no net impact on prior year unassigned surplus. In accordance with SSAP No. 3, Accounting Changes and Corrections of Errors, the impacts of this error were recorded as offsetting adjustments to unassigned surplus with no net impact to surplus in 2025.

During 2024, the Company discovered the following errors, totaling a \$3,194,326 overstatement of unassigned surplus as of December 31, 2023, that were recorded as an adjustment to unassigned surplus in 2024, in accordance with SSAP No. 3, Accounting Changes and Corrections of Errors ("SSAP No. 3"). The Company discovered an error in the indexed universal life product interest margin and cost of insurance rates used within the Principle-Based Reserve calculation, resulting in a \$3,605,674 overstatement of the prior year aggregate reserve for life contracts (page 3, line 1) and an overstatement of the increase in aggregate reserve for life and accident and health contracts (page 4, line 19). The Company discovered an error in a prior period policy loan entry calculated on a net basis instead of a gross basis, resulting in a \$6,800,000 overstatement of prior year contract loans (page 2, line 6) and an overstatement of net investment income (page 4, line 3).

The Company did not have any material accounting changes in accounting principles in 2024.

D. Asset-Backed Securities

(1) Prepayment assumptions for asset-backed securities are based on information obtained from brokers or internal estimates based on original term sheets, offer memoranda, historical performance, or other forecasts.

(2) Securities with a recognized other-than-temporary impairment ("OTTI") due to intent to sell, inability or lack of intent to retain the investment in the security for a period of time sufficient to recover the amortized cost basis:

Not Applicable

(3) Securities with a recognized OTTI due to present value of cash flows expected to be collected is less than the amortized cost basis of the security:

Not Applicable

(4) All impaired asset-backed securities (fair value is less than amortized cost) for which an OTTI has not been recognized in earnings as a realized loss (including securities with a recognized OTTI for non-interest related declines when a non-recognized interest related impairment remains) were as follows:

a) The aggregate amount of unrealized losses:

1. Less than 12 months	\$	11,690,305
2. 12 months or longer		221,069,294

b) The aggregate related fair value of securities with unrealized losses:

1. Less than 12 months	\$	998,524,840
2. 12 months or longer		2,107,421,429

(5) If the Company does not have the intent to sell and has the ability to retain the asset-backed security until recovery, OTTI is recognized when the present value of future cash flows discounted at the security's effective interest rate is less than the amortized cost basis as of the balance sheet date.

F. Repurchase Agreements Transactions Accounted for as Secured Borrowing

(1) The Company has repurchase agreements whereby unrelated parties, primarily major brokerage firms, borrow securities from the Company. The Company requires a minimum of 95% of the fair value of the securities loaned at the outset of the contract as collateral. The Company continues to retain control over and receive interest on loaned securities, and accordingly, the repurchase agreement securities continue to be reported as bonds. Cash collateral received is invested in cash equivalents and securities, and the Company records a corresponding liability for the collateral which is included in payable for securities lending on the statutory financial statements.

NOTES TO FINANCIAL STATEMENTS

B. Federal Home Loan Bank ("FHLB") Agreements

(1) The Company is a member of the FHLB of Topeka. The Company has an agreement with the FHLB under which the Company pledges FHLB approved collateral in return for extensions of credit. It is part of the Company's strategy to utilize these funds for operations or other long-term projects. Balances outstanding under this agreement are included in borrowed money. The Company holds FHLB stock as part of the borrowing agreement, which is included in common stocks. Through its membership, the Company has also entered into funding agreement contracts with the FHLB that are used as part of the Company's interest spread strategy. The Company applies SSAP No. 52, Deposit-Type Contracts, accounting treatment to these funds, consistent with other deposit-type contracts.

(1) The Company has securities lending agreements whereby unrelated parties, primarily large brokerage firms, borrow securities from the Company. The Company requires a minimum of 102% of the fair value of the domestic securities, loaned at the outset of the contract as collateral. The Company continues to retain control over and receive interest on loaned securities, and accordingly, the loaned securities continue to be reported as bonds. The securities loaned are on open terms and can be returned to the Company on the next business day requiring a return of the collateral. Collateral received is invested in cash equivalents and securities, and the Company records a corresponding liability for the collateral which is included in payable for securities lending on the statutory financial statements. The Company cannot access the collateral unless the borrower fails to deliver loaned securities. To further minimize the credit risks related to this securities lending program, the Company regularly monitors the financial condition of counterparties to these agreements and also receives an indemnification from the financial intermediary who structures the transactions.

STATEMENT AS OF MARCH 31, 2025 OF THE United of Omaha Life Insurance Company

NOTES TO FINANCIAL STATEMENTS

The Company had securities with a fair value of \$1,352,713,421 on loan for security lending and \$163,360,234 for repurchased lending under the program as of March 31, 2025. The Company was liable for cash collateral of \$1,399,046,882 for security lending and \$163,944,152 for repurchased lending as of March 31, 2025. The Company does not hold any security collateral as of March 31, 2025, which is not reflected in the accompanying financial statements. Of the collateral received, the Company has \$313,753,026 in collateral for securities lending and \$36,766,440 in repurchase lending that extends beyond one year from March 31, 2025.

Note 20 Fair Value Measurements

- A. Assets and Liabilities Reported at Fair Value or Net Asset Value ("NAV")

Financial assets and liabilities have been categorized into a three-level fair value hierarchy, based on the priority of the inputs to the respective valuation technique. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). An asset or liability's classification within the fair value hierarchy is based on the lowest level of significant input to valuation. The input levels are as follows:

- Level 1 — Fair value is based on unadjusted quoted prices in active markets that are accessible to the Company for identical assets or liabilities. These generally provide the most reliable evidence and are used to measure fair value whenever available.
- Level 2 — Fair value is based on significant inputs that are observable for the asset or liability, either directly or indirectly, through corroboration with observable market data. Level 2 inputs include quoted market prices in active markets for similar assets and liabilities, quoted market prices in markets that are not active for identical or similar assets or liabilities, and other market observable inputs. Valuations are generally obtained from third-party pricing services for identical or comparable assets or liabilities and validated or determined through use of valuation methodologies using observable market inputs.
- Level 3 — Fair value is based on significant unobservable inputs for the asset or liability. These inputs reflect assumptions about what market participants would use in pricing the asset or liability. Prices are determined using valuation methodologies such as option pricing models, discounted cash flow models, and other similar techniques.

(3) Policy on Transfers into and out of Level 3

Assets and liabilities are transferred into or out of Level 3 when a significant input can no longer be corroborated or can be corroborated with market observable data and are assumed to occur at the beginning of the period. This occurs when market activity decreases or increases related to certain securities and transparency to the underlying inputs is no longer available or can be observed with current pricing.

(4) Inputs and Techniques Used for Level 2 and Level 3 Fair Values

Level 2 Measurements

Preferred Stocks — These securities are principally valued using the market approach. The valuation of these securities is based principally on observable inputs including quoted prices in markets that are not considered active.

Common Stocks — These FHLB capital stocks are only redeemable at par, so the fair value is presumed to be par.

Separate Accounts — Separate accounts are comprised primarily of common collective trusts which are valued based on independent pricing services. The pricing services, in general, employ a market approach to valuing portfolio investments using market prices from exchanges or matrix pricing when quoted prices are not available, and other relevant data inputs as necessary. When current market prices or pricing service quotations are not available, the trustees use contractual cash flows and other inputs to value the funds.

Derivative Assets: Options — These derivatives are principally valued using an income approach. The valuation of these securities is based on present value techniques, which utilize significant inputs that may include implied volatility, swap yield curve, and repurchase rates.

U.S. Corporate — Price determined by an independent third-party source.

Level 3 Measurements

Asset-Backed Securities — These securities are principally valued using the market approach. The valuation of these securities is based primarily on matrix pricing or other similar techniques that utilize inputs that are unobservable or cannot be derived principally from, or corroborated by, observable market data, or are based on independent non-binding broker quotations.

U.S. Corporate — These securities are principally valued using the market and income approaches with significant adjustments that utilize unobservable inputs or cannot be derived principally from, or corroborated by, observable market data, including additional spread adjustments to reflect industry trends or specific credit-related issues. Valuations may be based on independent non-binding broker quotations. The use of independent non-binding broker quotations to value investments generally indicates there is a lack of liquidity or the general lack of transparency to develop the valuation estimates generally causing these investments to be classified in Level 3. Generally, below investment grade privately placed or distressed securities included in this level are valued using discounted cash flow methodologies which rely upon significant, unobservable inputs and inputs that cannot be derived principally from, or corroborated by, observable market data.

(5) Fair Value Disclosures for Derivative Assets and Liabilities

For the disclosures in paragraphs (1)-(4), there is no difference between the gross and net basis of derivatives.

Derivative liabilities	(21,015,571)	30,995,476	—	(21,015,571)	—	—	—

The following methods and assumptions were used by the Company in estimating its fair value disclosures for financial instruments:

Bonds — Fair values for bonds, including asset-backed securities, are based on quoted market prices, where available. For bonds for which market values are not readily available, fair values were estimated by the Company using projected future cash flows, current market rates, credit quality, and maturity date.

Cash and Cash Equivalents — The carrying value for cash and other cash equivalents approximates fair value.

Preferred Stocks — Fair values for preferred stocks are based on market value, where available. For preferred stocks for which market values are not available, fair values were estimated by the Company using projected future cash flows, current market rates, credit quality, and maturity date.

Common Stocks - Unaffiliated — These securities are principally valued using the market approach. The valuation of these securities is based principally on observable inputs including quoted prices in active markets.

Mortgage Loans — Fair values for mortgage loans are estimated by discounting expected future cash flows using current interest rates for similar loans with similar credit risk.

Other Invested Assets - Surplus Notes, Capital Notes, Debt Securities that Lack Meaningful Cash Flows — Fair values for other invested assets - surplus notes and other invested assets - capital notes are based on quoted market prices for similar assets or when quoted market prices are available. For debt securities for which market values are not readily available, fair values were estimated by the Company using projected future cash flows, current market rates, credit quality, and maturity date.

Contract Loans — Contract loans are stated at the aggregate unpaid balance plus any accrued interest which is 90 days or more past due.

Short-term Investments — The carrying value of short-term unsecured revolving credit notes approximates fair value and is included within Level 2 due to the internal nature and with no public market.

Securities Lending Cash Collateral and Payable for Securities Lending — Comprised of U.S. Direct Obligation/Full Faith and Credit Exempt money market instruments, commercial paper, cash, and all highly-liquid debt securities purchased with an original maturity of less than three months. The money market instruments are valued using unadjusted quoted prices in active markets that are accessible for identical assets and are primarily classified as Level 1. If public quotations are not available for commercial paper or debt securities, because of the highly-liquid nature of these assets, the carrying value may be used to approximate fair value.

Derivative Assets and Derivative Liabilities — These derivatives are principally valued using an income approach. The valuation of these securities is based on present value techniques and option pricing models, which utilize significant inputs that may include implied volatility, the swap yield curve, and repurchase rates.

Deposit-type Contracts — Fair values of guaranteed interest contracts, annuities, and supplementary contracts without life contingencies in payout status are estimated by calculating an average present value of expected cash flows over a broad range of interest rate scenarios using the current market risk-free interest rates adjusted for spreads required for publicly traded bonds issued by comparably rated insurers. The carrying amount for all other deposit-type contracts approximates fair value.

Borrowings — Fair values of long-term FHLB borrowings are estimated by discounting expected future cash flows using current interest rates for debt with comparable terms and are included within Level 2. Fair values of short-term FHLB borrowings approximates carrying value and are included within Level 1. The carrying value of short-term unsecured revolving credit notes approximates fair value and is included within Level 2 due to the internal nature and with no public market.

Derivative Cash Collateral — Comprised of U.S. Direct Obligation/Full Faith and Credit Exempt money market instruments, commercial paper, cash, and all highly-liquid debt securities purchased with an original maturity of less than three months. The money market instruments are valued using unadjusted quoted prices in active markets that are accessible for identical assets and are primarily classified as Level 1. If public quotations are not available for commercial paper or debt securities, because of the highly-liquid nature of these assets, the carrying value may be used to approximate fair value.

D. Not Practicable to Estimate Fair Value

Type or Class of Financial Instrument	Carrying Value	Effective Interest Rate	Maturity Date	Explanation
Preferred stocks	\$ 100,000,000			It is not practicable to measure the fair value in certain private preferred stock.
Common stocks - unaffiliated	7,245,327			It is not practicable to measure the fair value when using the equity method and when measuring fair value in certain private common stock.
Contract loans	371,061,047	5.64%		Contract loans are often repaid by reducing policy benefits and due to their variable maturity dates.

E. The Company does not have any investments measured using the NAV practical expedient pursuant to SSAP No. 100 Fair Value.
