A. Accounting Practices

The Company has prepared the accompanying statutory financial statements in conformity with accounting practices prescribed or permitted by the State of Nebraska Department of Insurance ("NDOI"). The state of Nebraska has adopted the National Association of Insurance Commissioners' ("NAIC") statutory accounting principles ("NAIC SAP") as the basis of its statutory accounting practices. The Director of the NDOI has the right to permit other specific practices that may deviate from NAIC SAP. The Company does not utilize any permitted practices however, there is an impact on its results of operations and surplus from the prescribed practices followed by its subsidiaries Companion and Omaha Re.

The following is a reconciliation of the Company's net income (loss) and capital and surplus between the practices prescribed or permitted by the NDOI and NAIC SAP as of and for the period ended March 31 and December 31:

	SSAP #	F/S Page	F/S Line #	2026	2025

B. Use of Estimates in the Preparation of the Financial Statements

No Change

C. Accounting Policy

The Company used the following accounting policies:

- (1) No Change
- (2) Bonds are stated at amortized cost using the effective yield method, except for certain bonds with an NAIC designation of 6, which are stated at lower of amortized cost or fair value.
- (3) - (5) No Change
- (6) Premiums and discounts on asset-backed securities are amortized using the prospective or retrospective method based on anticipated prepayments from the date of purchase. Changes in estimated cash flows due to changes in estimated prepayments are accounted for using the prospective method for impaired securities and securities valued based on an index, and the retrospective method for all other securities.
- (7) - (13) No Change

D. Going Concern

Management's evaluation of all known and reasonably knowable conditions and events for the Company, as of March 31, 2026, has concluded there are no substantial doubts about the entity's ability to continue as a going concern, or meet its obligations within one year of the financial statement's issuance date.

D. Asset-Backed Securities

(1) Prepayment assumptions for asset-backed securities are based on information obtained from brokers or internal estimates based on original term sheets, offer memoranda, historical performance, or other forecasts.

(2) Securities with a recognized other-than-temporary impairment ("OTTI") due to intent to sell, inability or lack of intent to retain the investment in the security for a period of time sufficient to recover the amortized cost basis:

Not Applicable

(3) Securities with a recognized OTTI due to present value of cash flows expected to be collected is less than the amortized cost basis of the security:

Not Applicable

(4) All impaired asset-backed securities (fair value is less than amortized cost) for which an OTTI has not been recognized in earnings as a realized loss (including securities with a recognized OTTI for non-interest related declines when a non-recognized interest related impairment remains) were as follows:

a) The aggregate amount of unrealized losses:

1. Less than 12 months	\$ 38,835,248
2. 12 months or longer	195,493,877

F. Repurchase Agreements Transactions Accounted for as Secured Borrowing

(1) The Company has repurchase agreements whereby unrelated parties, primarily major brokerage firms, borrow securities from the Company. The Company requires a minimum of 95% of the fair value of the securities loaned at the outset of the contract as collateral. The Company continues to retain control over and receive interest on loaned securities, and accordingly, the repurchase agreement securities continue to be reported as bonds. Cash collateral received is invested in cash equivalents and securities, and the Company records a corresponding liability for the collateral which is included in payable for securities lending on the statutory financial statements. The Company had no outstanding balances under repurchase agreements as of March 31, 2026.

B. Federal Home Loan Bank ("FHLB") Agreements

(1) The Company is a member of the FHLB of Topeka. The Company has an agreement with the FHLB under which the Company pledges FHLB approved collateral in return for extensions of credit. It is part of the Company's strategy to utilize these funds for operations or other long-term projects. Balances outstanding under this agreement are included in borrowed money. The Company holds FHLB stock as part of the borrowing agreement, which is included in common stocks. Through its membership, the Company has also entered into funding agreement contracts with the FHLB that are used as part of the Company's interest spread strategy. The Company applies SSAP No. 52, Deposit-Type Contracts, accounting treatment to these funds, consistent with other deposit-type contracts.

B. Transfer and Servicing of Financial Assets

- (1) The Company has securities lending agreements whereby unrelated parties, primarily large brokerage firms, borrow securities from the Company. The Company requires a minimum of 102% of the fair value of the domestic securities, loaned at the outset of the contract as collateral. The Company continues to retain control over and receive interest on loaned securities, and accordingly, the loaned securities continue to be reported as bonds. The securities loaned are on open terms and can be returned to the Company on the next business day requiring a return of the collateral. Collateral received is invested in accordance with a separate, risk-averse investment policy comprised of cash equivalents and securities, and the Company records a corresponding liability for the collateral which is included in payable for securities lending on the statutory financial statements. The Company cannot access the collateral unless the borrower fails to deliver loaned securities. To further minimize the credit risks related to this securities lending program, the Company regularly monitors the financial condition of counterparties to these agreements and also receives an indemnification from the financial intermediary who structures the transactions.

The Company had securities with a fair value of \$919,509,951 on loan for security lending as of March 31, 2026. The Company was liable for cash collateral of \$961,360,275 for security lending as of March 31, 2026. The Company does not hold any security collateral as of March 31, 2026, which is not reflected in the accompanying financial statements. Of the collateral received, the Company has \$264,941,121 in collateral for securities lending that extends beyond one year from March 31, 2026.

Note 20 Fair Value Measurements

A. Assets and Liabilities Reported at Fair Value or Net Asset Value ("NAV")

Financial assets and liabilities have been categorized into a three-level fair value hierarchy, based on the priority of the inputs to the respective valuation technique. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). An asset or liability's classification within the fair value hierarchy is based on the lowest level of significant input to valuation. The input levels are as follows:

Level 1 — Fair value is based on unadjusted quoted prices in active markets that are accessible to the Company for identical assets or liabilities. These generally provide the most reliable evidence and are used to measure fair value whenever available.

Level 2 — Fair value is based on significant inputs that are observable for the asset or liability, either directly or indirectly, through corroboration with observable market data. Level 2 inputs include quoted market prices in active markets for similar assets and liabilities, quoted market prices in markets that are not active for identical or similar assets or liabilities, and other market observable inputs. Valuations are generally obtained from third-party pricing services for identical or comparable assets or liabilities and validated or determined through use of valuation methodologies using observable market inputs.

Level 3 — Fair value is based on significant unobservable inputs for the asset or liability. These inputs reflect assumptions about what market participants would use in pricing the asset or liability. Prices are determined using valuation methodologies such as option pricing models, discounted cash flow models, and other similar techniques.

Transferred from level 2 to level 3 because of lack of observable market data due to decrease in market activity for these securities. The reporting entity's policy is to recognize transfers in and out as of the actual date of the event or change in circumstances that caused the transfer.

(3) Policy on Transfers into and out of Level 3

Assets and liabilities are transferred into or out of Level 3 when a significant input can no longer be corroborated or can be corroborated with market observable data and are assumed to occur at the beginning of the period. This occurs when market activity decreases or increases related to certain securities and transparency to the underlying inputs is no longer available or can be observed with current pricing.

(4) Inputs and Techniques Used for Level 2 and Level 3 Fair Values

Level 2 Measurements

Other Invested Assets - Capital Notes — Fair values are based on evaluated prices received from third-party providers. The evaluated prices are based on analytical evaluations using models and comparables.

Preferred Stocks — These securities are principally valued using the market approach. The valuation of these securities is based principally on observable inputs including quoted prices in markets that are not considered active.

Common Stocks — These FHLB capital stocks are only redeemable at par, so the fair value is presumed to be par.

Separate Accounts — Separate accounts are comprised primarily of common collective trusts which are valued based on independent pricing services. The pricing services, in general, employ a market approach to valuing portfolio investments using market prices from exchanges or matrix pricing when quoted prices are not available, and other relevant data inputs as necessary. When current market prices or pricing service quotations are not available, the trustees use contractual cash flows and other inputs to value the funds.

Derivative Assets and Derivative Liabilities — These derivatives are principally valued using an income approach. The valuation of these securities is based on present value techniques, which utilize significant inputs that may include implied volatility, swap yield curve, and repurchase rates.

Asset-Backed Securities — Prices for Public issuance are determined by independent third-party sources and employing a market approach wherever reliable observable pricing exists and transitions to an income approach as liquidity declines or structural complexity increases, while consistently calibrating models back to real market behavior. Prices for Private issuance are determined using the income approach using market observable inputs.

Level 3 Measurements

Other Invested Assets - Debt Securities that Lack Meaningful Cash Flows — For other invested assets - debt securities that lack meaningful cash flows for which market values are not readily available, fair values are estimated by the Company using projected future cash flows, current market rates, credit quality, and maturity date.

STATEMENT AS OF MARCH 31, 2026 OF THE United of Omaha Life Insurance Company
NOTES TO FINANCIAL STATEMENTS

Issuer credit obligations — These securities are principally valued using the market and income approaches with significant adjustments that utilize unobservable inputs or cannot be derived principally from, or corroborated by, observable market data, including additional significant spread adjustments to reflect industry trends or specific credit-related issues. Valuations may be based on independent non-binding broker quotations. Generally, below investment grade privately placed or distressed securities included in this level are valued using discounted cash flow methodologies which rely upon significant, unobservable inputs and inputs that cannot be derived principally from, or corroborated by, observable market data.

The following methods and assumptions were used by the Company in estimating its fair value disclosures for financial instruments:

Issuer Credit Obligations and Asset-Backed Securities ("Bonds") — Fair values for bonds are based on quoted market prices, where available. For bonds for which market values are not readily available, fair values were estimated by the Company using projected future cash flows, current market rates, credit quality, and maturity date.

Cash and Cash Equivalents — The carrying value for cash and other cash equivalents approximates fair value.

Preferred Stocks — Fair values for preferred stocks are based on market value, where available. For preferred stocks for which market values are not available, fair values were estimated by the Company using projected future cash flows, current market rates, credit quality, and maturity date.

Common Stocks - Unaffiliated — These securities are principally valued using the market approach. The valuation of these securities is based principally on observable inputs including quoted prices in active markets.

Mortgage Loans — Fair values for mortgage loans are estimated by discounting expected future cash flows using current interest rates for similar loans with similar credit risk.

Other Invested Assets - Surplus Notes and Capital Notes — Fair values are based on evaluated prices received from third-party providers. The evaluated prices are based on analytical evaluations using models and comparables.

Other Invested Assets - Debt Securities that Lack Meaningful Cash Flows — For other invested assets-debt securities that lack meaningful cash flows for which market values are not readily available, fair values are estimated by the Company using projected future cash flows, current market rates, credit quality, and maturity date.

Contract Loans — Contract loans are stated at the aggregate unpaid balance plus any accrued interest which is 90 days or more past due.

Short-term Investments — The carrying value of short-term unsecured revolving credit notes approximates fair value and is included within Level 2 due to the internal nature and with no public market.

Securities Lending Cash Collateral and Payable for Securities Lending — Comprised of U.S. Direct Obligation/Full Faith and Credit Exempt money market instruments, commercial paper, cash, and all highly-liquid debt securities purchased with an original maturity of less than three months. The money market instruments are valued using unadjusted quoted prices in active markets that are accessible for identical assets and are primarily classified as Level 1. If public quotations are not available for commercial paper or debt securities, because of the highly-liquid nature of these assets, the carrying value may be used to approximate fair value.

Derivative Assets and Derivative Liabilities — These derivative instruments are principally valued using an income approach. The valuation of these instruments is based on present value techniques and option pricing models, which utilize significant observable market inputs including underlying equity prices, implied volatility, interest rate yield curves, spot and forward foreign exchange rates, cross-currency basis spreads, and repurchase rates.

Deposit-type Contracts — Fair values of guaranteed interest contracts, annuities, and supplementary contracts without life contingencies in payout status are estimated by calculating an average present value of expected cash flows over a broad range of interest rate scenarios using the current market risk-free interest rates adjusted for spreads required for publicly traded bonds issued by comparably rated insurers. The carrying amount for all other deposit-type contracts approximates fair value.

Borrowings — Fair values of long-term FHLB borrowings are estimated by discounting expected future cash flows using current interest rates for debt with comparable terms and are included within Level 2. Fair values of short-term FHLB borrowings approximates carrying value and are included within Level 1. The carrying value of short-term unsecured revolving credit notes approximates fair value and is included within Level 2 due to the internal nature and with no public market.

Derivative Cash Collateral — Comprised of U.S. Direct Obligation/Full Faith and Credit Exempt money market instruments, commercial paper, cash, and all highly-liquid debt securities purchased with an original maturity of less than three months. The money market instruments are valued using unadjusted quoted prices in active markets that are accessible for identical assets and are primarily classified as Level 1. If public quotations are not available for commercial paper or debt securities, because of the highly-liquid nature of these assets, the carrying value may be used to approximate fair value.
