RBC Information: Each of United of Omaha and Mutual of Omaha is required to report risk-based capital ("RBC") data, including its company action level RBC ratio ("RBC Ratio"), to the Nebraska Department of Insurance ("NE DOI") annually. The RBC Ratio is calculated based on a formula which applies factors to various asset, premium and statutory reserve items and accounts for risk characteristics of the insurer.NE DOI uses RBC data as a regulatory tool to identify possible inadequately capitalized insurers for purposes of initiating regulatory action and not as a means to rank insurers generally. Nebraska law imposes broad confidentiality restrictions against the use and publication of RBC data by those engaged in the insurance business (including insurers, agents, brokers and others) and by the NE DOI. Inclusion of the RBC Ratio in this presentation is intended solely for informational purposes for investors, prospective investors, banking and other counterparties with respect to institutional products and other commercial transactions and not for the use or disclosure by those engaged in the insurance business.
