A. Accounting Practices

The Company has prepared the accompanying statutory financial statements in conformity with accounting practices prescribed or permitted by the State of Nebraska Department of Insurance ("NDOI"). The state of Nebraska has adopted the National Association of Insurance Commissioners' ("NAIC") statutory accounting principles ("NAIC SAP") as the basis of its statutory accounting practices. The Director of the NDOI has the right to permit other specific practices that may deviate from NAIC SAP. The Company does not utilize any permitted practices however, there is an impact on its results of operations and surplus from the prescribed practices followed by its subsidiaries Companion and Omaha Re as discussed in Note 10 N.

The following is a reconciliation of the Company's net income (loss) and capital and surplus between the practices prescribed or permitted by the state of Nebraska and NAIC SAP as of and for the year ended December 31:

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of statutory financial statements in accordance with NAIC SAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the statutory financial statements, and reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

C. Accounting Policy

The Company used the following accounting policies:

- (1) Short-term investments include related party notes, if applicable, and investments whose remaining maturities at the time of purchase are three months to one year and are stated at cost, which approximates fair value.
- (2) Bonds are stated at amortized cost using the effective yield method, except for certain bonds with an NAIC designation of 6, which are stated at lower of amortized cost or fair value.
- (3) Common stocks of unaffiliated companies are generally stated at fair value, common stocks of affiliated insurance companies, excluding Omaha Re, are stated at their audited statutory equity value. Omaha Re is a wholly owned special purpose financial captive life insurance subsidiary domiciled in the State of Nebraska and is stated at its audited statutory equity less an admitted other security asset value-excess of loss for which Omaha Re has a NDOI prescribed practice. Common stocks of affiliated non-insurance companies are stated at their GAAP equity value. The Federal Home Loan Bank ("FHLB") capital stocks are stated at cost.
- (4) Redeemable preferred stocks are stated at amortized cost and perpetual preferred stock are stated at fair value; except for redeemable preferred stocks that are NAIC rated 4 through 6, which are stated at lower of amortized cost or fair value.
- (5) Mortgage loans held for investment are stated at the aggregate unpaid principal balance adjusted for unamortized premium or discount, except impaired loans. Impaired loans are stated at the lower of the amortized cost or the fair value of the loan determined by the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's observable market price, or the fair value of the collateral less costs to sell if collateral dependent. Interest income is accrued on the unpaid principal balance based on the loan's contractual interest rate. The Company records a reserve for losses on mortgage loans as part of the Asset Valuation Reserve ("AVR").

ANNUAL STATEMENT FOR THE YEAR 2022 OF THE United of Omaha Life Insurance Company

NOTES TO FINANCIAL STATEMENTS

- (6) Premiums and discounts on loan-backed bonds and structured securities are amortized using the prospective or retrospective method based on anticipated prepayments from the date of purchase. Changes in estimated cash flows due to changes in estimated prepayments are accounted for using the prospective method for impaired securities and securities valued based on an index, and the retrospective method for all other securities.
- (7) The following are wholly owned insurance subsidiaries of the Company as of December 31, 2022: Companion, United World, and each are valued at their respective statutory surplus as of December 31, 2022. Medicare Advantage Company is stated at its respective statutory surplus and is 100% non-admitted as of December 31, 2022. Omaha Re is a wholly owned special purpose financial captive life insurance subsidiary domiciled in the State of Nebraska and is stated at its audited statutory equity less an admitted other security asset value—excess of loss for which Omaha Re has a NDOI prescribed practice. As of December 31, 2022, the carrying value of Omaha Re is zero.

The Company owns 100% of the outstanding common stock of Mutual Structured Settlement. As of December 31, 2022, the carrying value of Mutual Structured Settlement is zero. Affiliated joint ventures include approximately 80% of Fulcrum, 99% of MOOF Fund and Cloverlay; other ownership interest in UM Holdings, 50% of MGG Fund, United DMLT Trust, DMLT Trust, and EMLT-U. Affiliated joint ventures are stated at their underlying GAAP equity, which approximates fair value, with a one-quarter lag adjusted for all capital distributions, cash distributions, and impairment charges for the quarter with changes recorded in net unrealized capital gains (losses), a component of unassigned surplus. Fair values of the affiliated joint ventures are determined using the underlying audited GAAP financial statements or audited trust statement value. Distributions of income from these affiliated joint ventures are recorded in net investment income. As of December 31, 2022, the carrying value of UM Holdings is zero.

The Company owns 83.04% of Boston Fund and 91.25% of MHEG Fund, non-guaranteed state low income housing tax credits ("LIHTC") and are carried at proportional amortized cost.

The Company owns approximately 75% of Legacy Trust, a bond which is stated at amortized cost using the effective yield method.

- (8) The Company owns limited partnership investments and also has minor ownership interests in joint ventures. Joint ventures and limited partnerships are carried at their underlying audited GAAP equity.
- (9) Derivatives generally include swaps-foreign exchange and purchase options-other call options and warrants. When derivative financial instruments meet specific criteria they may be designated as accounting hedges and accounted for on an amortized cost basis, in a manner consistent with the item hedged. Derivative financial instruments that are not designated as accounting hedges are accounted for on a fair value basis with changes recorded as a change in net unrealized capital gains (losses), a component of unassigned surplus, and nonadmitted. Interest on swaps-foreign exchange and purchase options-other call options and warrants is included in net investment income
- (10) The Company does not have a premium deficiency reserve in accordance with SSAP No. 54R, Individual and Group Accident and Health Contracts.
- (11) Active life reserves for accident and health contracts provide amounts estimated to adequately discharge estimated future obligations in excess of estimated future net premiums on policies in force. The reserves are calculated using prescribed mortality and using Company morbidity and interest rate assumptions. Morbidity assumptions are either industry experience or a blend of industry and Company experience. Lapse assumptions, when applicable, are based on Company experience with statutory limitations. Such reserves are calculated on a net level premium method or on a one- or two-year preliminary term basis.

Claim reserves include disabled life reserves that reflect amounts that are either not yet due or yet to arise on claims incurred with a continuing loss. Such reserves are based on statutory interest and claim termination rates based on either industry or a blend of the Company and industry experience in compliance with statutory requirements. Revisions of these estimates are reflected in operations in the year they are made.

Unpaid claim liabilities include the amounts estimated for claims that have been reported but not settled and estimates for claims incurred but not reported. Such reserves are estimated based upon the Company's and affiliates' historical experience and other actuarial assumptions that consider the effects of current developments, payment patterns, membership patterns, anticipated trends, claim utilization, product changes, risk management programs, and other factors. The liabilities are continually reviewed and adjustments and changes are reflected in the year they are made.

- (12) The Company adjusted its capitalization policy as it relates to its threshold for capitalizing prepaid expenses, increasing the threshold to \$100,000 in order for any prepaid to be capitalized.
- (13) The Company does not have any pharmaceutical rebate receivables.

D. Going Concern

Management's evaluation of all known and reasonably knowable conditions and events for the Company, as of December 31, 2022, has concluded there are no substantial doubts about the entity's ability to continue as a going concern, or meet its obligations within one year of the financial statement's issuance date.

Note 2 Accounting Changes and Corrections of Errors

During 2022, the Company discovered an error in the risk-free rates used in AG36 reserve calculations for the indexed universal life product, resulting in a \$4,486,889 overstatement of both aggregate reserve for life contracts (page 3, line 1) and increase in aggregate reserves for life and accident and health contracts (page 4, line 19) and a \$4,486,889 understatement of unassigned surplus as of December 31, 2021. In accordance with SSAP No. 3 Accounting Changes and Corrections of Errors, the impact of this error was recorded as an adjustment to unassigned surplus in 2022.

During 2021, the Company discovered errors in the settlement option parameters in a deferred fixed annuity product valuation model, resulting in a cumulative \$13,395,650 net overstatement of reserves. Aggregate reserve for life contracts, page 3, line 1, and Aggregate write-ins for gains and losses in surplus, page 4, line 53, were adjusted in 2021 to correct for this error. These prior year misstatements were not concluded to be material both individually and in the aggregate and therefore have been corrected as of December 31, 2021, in accordance with SSAP No. 3 Accounting Changes and Corrections of Errors, through unassigned surplus.

ANNUAL STATEMENT FOR THE YEAR 2022 OF THE United of Omaha Life Insurance Company

NOTES TO FINANCIAL STATEMENTS

Note 8 Derivative Instruments

A. Derivatives under SSAP No. 86, Derivatives

- (1) All derivatives' market values change along with the underlying assets, currencies, and equity prices. The market value of purchased options-other call options and warrants cannot be less than zero and the market value of swaps can be less than zero. The Company may be required to post collateral, often in the form of cash against swaps with negative values.

For swaps-foreign exchange, the Company is exposed to credit-related losses in the amount of the net currency differential in the event of nonperformance by the swap counterparty. For purchase options-other call options and warrants, the Company is exposed to credit-related losses in the amount of the option payoff amount in the event of a nonperformance by the counterparty. Counterparty risk is continually monitored along with criteria related to collateral requirements that are specified in the credit support annex of the International Swaps and Derivatives Association. Due to the investment grade rating of the counterparty, credit-related losses are considered to be very unlikely. Counterparty credit risk is further reduced by daily collateral postings.

- (2) The Company uses currency swaps-foreign exchange, when applicable, to hedge the foreign currency risk on debt issues that are payable in a currency other than U.S. dollars.

The Company uses purchase options-other call options and warrants to hedge the risk of the crediting rates on indexed universal life policies.

- (3) Swaps-foreign exchange transactions generally involve the exchange of funds received in the course of principal and interest collections on securities denominated in a foreign currency to U.S. dollars at a predetermined rate. The Company designates certain of its swaps-foreign exchange as cash flow hedges when they are highly effective in offsetting the exposure of variations in cash flows for the hedged item. Gains and losses resulting from early termination of swaps-foreign exchange transactions that use hedge accounting are deferred and amortized over the remaining period originally covered by the swap. Gains and losses resulting from changes in fair value on swaps-foreign exchange that do not use hedge accounting are reported as unrealized gains (losses), a component of unassigned surplus. Interest on the base security is reported at the current rate on Schedule D. Interest earned on the original exchange rate is reported on Schedule DB.

Under a purchase options-other call options and warrants, the Company pays a one-time premium to the counterparty while the counterparty agrees to deliver at expiration, the value based on the S&P 500. Gains and losses resulting from early termination of purchased options-hedging other-call options and warrants transactions that use hedge accounting are deferred and amortized over the remaining period originally covered by the purchase option. Gains and losses resulting from changes in fair value on purchased options-hedging other-call options and warrants that do not use hedge accounting are reported as unrealized gains (losses). Interest on the base security is reported at the current rate on Schedule D. Interest earned on the original exchange rate is reported on Schedule DB.

See Schedule DB of the Company's annual statement for additional details.

- (2) The Company uses swaps-foreign exchange to hedge the foreign currency risk on debt issues that are payable in a currency other than US dollars. Swap-foreign exchange transactions generally involve the exchange of funds received in the course of principal and interest collections on securities denominated in a foreign currency to U.S. dollars at a predetermined rate. Generally, cash is exchanged at the outset of a swap-foreign exchange with US dollars sent to the counterparty in exchange for foreign currency at a predetermined rate.
- The Company uses purchase options-other call options and warrants to hedge the risk of the crediting rates on indexed universal life policies. Under purchase options-other call options and warrants, the Company pays a one time premium to the counterparty while the counterparty agrees to deliver at expiration, the value based on the S&P 500. The Company pays cash to the counterparty at the inception of the contract, and the counterparty pays cash to the Company at expiration. No other cash is exchanged.
- (3) For swaps-foreign exchange, the Company is exposed to credit-related losses in the amount of the net currency differential in the event of nonperformance by the swap counterparty. For purchase options-hedging other-call options and warrants, the Company is exposed to credit-related losses in the amount of the option payoff amount in the event of nonperformance by the counterparty. Counterparty risk is continually monitored along with criteria related to collateral requirements that are specified in the credit support annex of the ISDA. Due to the investment grade rating of the counterparty, credit-related losses are considered to be very unlikely. Counterparty credit risk is further reduced by daily collateral postings.
- (4) The collateral requirements, as well as acceptable forms of collateral, for each counterparty are identified in the credit support annex of the ISDA.

Note 17 Sale, Transfer and Servicing of Financial Assets and Extinguishments of Liabilities

A. Transfers of Receivables Reported as Sales

Not Applicable

B. Transfer and Servicing of Financial Assets

- (1) The Company has securities lending agreements whereby unrelated parties, primarily large brokerage firms, borrow securities from the Company. The Company requires a minimum of 102% of the fair value of the domestic securities, loaned at the outset of the contract as collateral. The Company continues to retain control over and receive interest on loaned securities, and accordingly, the loaned securities continue to be reported as bonds. The securities loaned are on open terms and can be returned to the Company on the next business day requiring a return of the collateral. Collateral received is invested in cash equivalents and securities, and the Company records a corresponding liability for the collateral which is included in payable for securities lending on the statutory financial statements. The Company cannot access the collateral unless the borrower fails to deliver loaned securities. To further minimize the credit risks related to this securities lending program, the Company regularly monitors the financial condition of counterparties to these agreements and also receives an indemnification from the financial intermediary who structures the transactions.

The Company had securities with a fair value of \$831,447,478 on loan for security lending as of December 31, 2022. The Company was liable for cash collateral of \$867,713,771 for security lending as of December 31, 2022. The Company does not hold any security collateral as of December 31, 2022, which is not reflected in the accompanying financial statements. Of the collateral received, the Company has \$101,327,743 in collateral for securities lending that extends beyond one year from December 31, 2022.

Note 20 Fair Value Measurements

A. Assets and Liabilities Reported at Fair Value or Net Asset Value ("NAV")

Financial assets and liabilities have been categorized into a three-level fair value hierarchy, based on the priority of the inputs to the respective valuation technique. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). An asset or liability's classification within the fair value hierarchy is based on the lowest level of significant input to valuation. The input levels are as follows:

Level 1 — Fair value is based on unadjusted quoted prices in active markets that are accessible to the Company for identical assets or liabilities. These generally provide the most reliable evidence and are used to measure fair value whenever available.

Level 2 — Fair value is based on significant inputs that are observable for the asset or liability, either directly or indirectly, through corroboration with observable market data. Level 2 inputs include quoted market prices in active markets for similar assets and liabilities, quoted market prices in markets that are not active for identical or similar assets or liabilities, and other market observable inputs. Valuations are generally obtained from third party pricing services for identical or comparable assets or liabilities and validated or determined through use of valuation methodologies using observable market inputs.

Level 3 — Fair value is based on significant unobservable inputs for the asset or liability. These inputs reflect assumptions about what market participants would use in pricing the asset or liability. Prices are determined using valuation methodologies such as option pricing models, discounted cash flow models, and other similar techniques.

(3) Policy on Transfers into and out of Level 3

Assets and liabilities are transferred into or out of Level 3 when a significant input can no longer be corroborated or can be corroborated with market observable data and are assumed to occur at the beginning of the period. This occurs when market activity decreases or increases related to certain securities and transparency to the underlying inputs is no longer available or can be observed with current pricing.

(4) Inputs and Techniques Used for Level 2 and Level 3 Fair Values

Level 2 Measurements

Preferred Stocks — These securities are principally valued using the market approach. The valuation of these securities is based principally on observable inputs including quoted prices in markets that are not considered active.

Common Stocks — These FHLB capital stocks are only redeemable at par, so the fair value is presumed to be par.

Separate Accounts — Separate accounts are comprised primarily of common collective trusts which are valued based on independent pricing services and non-binding broker quotations. The pricing services, in general, employ a market approach to valuing portfolio investments using market prices from exchanges or matrix pricing when quoted prices are not available, and other relevant data inputs as necessary. When current market prices or pricing service quotations are not available, the trustees use contractual cash flows and other inputs to value the funds.

Derivative Assets: Options — These derivatives are principally valued using an income approach. The valuation of these securities is based on present value techniques, which utilize significant inputs that may include implied volatility, swap yield curve, LIBOR basis curves, and repurchase rates.

Level 3 Measurements

Asset-Backed Securities and All Other Governments — These securities are principally valued using the market approach. The valuation of these securities is based primarily on matrix pricing or other similar techniques that utilize inputs that are unobservable or cannot be derived principally from, or corroborated by, observable market data, or are based on independent non-binding broker quotations.

U.S. Corporate — These securities are principally valued using the market and income approaches with significant adjustments that utilize unobservable inputs or cannot be derived principally from, or corroborated by, observable market data, including additional spread adjustments to reflect industry trends or specific credit-related issues. Valuations may be based on independent non-binding broker quotations. The use of independent non-binding broker quotations to value investments generally indicates there is a lack of liquidity or the general lack of transparency to develop the valuation estimates generally causing these investments to be classified in Level 3. Generally, below investment grade privately placed or distressed securities included in this level are valued using discounted cash flow methodologies which rely upon significant, unobservable inputs and inputs that cannot be derived principally from, or corroborated by, observable market data.

For the disclosures in paragraphs (1)-(4), there is no difference between the gross and net basis of derivatives.

The following methods and assumptions were used by the Company in estimating its fair value disclosures for financial instruments:

- Bonds — Fair values for bonds, including loan-backed securities, are based on quoted market prices, where available. For bonds for which market values are not readily available, fair values were estimated by the Company using projected future cash flows, current market rates, credit quality, and maturity date.
- Cash and Cash Equivalents — The carrying amount for cash and other cash equivalents approximates fair value.
- Preferred Stocks — Fair values for preferred stocks are based on market value, where available. For preferred stocks for which market values are not available, fair values were estimated by the Company using projected future cash flows, current market rates, credit quality, and maturity date.
- Common Stocks-Unaffiliated — These securities are principally valued using the market approach. The valuation of these securities is based principally on observable inputs including quoted prices in active markets.
- Mortgage Loans — Fair values for mortgage loans are estimated by discounting expected future cash flows using current interest rates for similar loans with similar credit risk.
- Other Invested Assets-Surplus Notes — Fair values for other invested assets-surplus notes are based on quoted market prices for similar assets.
- Contract Loans — Contract loans are stated at the aggregate unpaid balance plus any accrued interest which is 90 days or more past due.
- Short-term Investments — Fair values for short-term investments includes public bonds and short-term revolvers. The public bonds are valued using a discounted cash flow methodology using standard market observable inputs, and inputs derived from, or corroborated by, market observable data, including the market yield curve, duration, call provisions, observable prices, and spreads for similar publicly traded issues that incorporate the credit quality and industry sector of the issuer. The carrying value of short-term unsecured revolving credit notes approximates fair value and are included within Level 2 due to the internal nature and with no public market.
- Securities Lending Cash Collateral and Payable for Securities Lending - Comprised of U.S. Direct Obligation/Full Faith and Credit Exempt money market instruments, commercial paper, cash, and all highly-liquid debt securities purchased with an original maturity of less than three months. The money market instruments are valued using unadjusted quoted prices in active markets that are accessible for identical assets and are primarily classified as Level 1. If public quotations are not available for commercial paper or debt securities, because of the highly-liquid nature of these assets, the carrying amount may be used to approximate fair value.
- Derivative Assets and Liabilities — These derivatives are principally valued using an income approach. The valuation of these securities is based on present value techniques and option pricing models, which utilize significant inputs that may include implied volatility, the swap yield curve, LIBOR basis curves,and repurchase rates.
- Deposit-type Contracts — Fair values of guaranteed interest contracts, annuities, and supplementary contracts without life contingencies in payout status are estimated by calculating an average present value of expected cash flows over a broad range of interest rate scenarios using the current market risk-free interest rates adjusted for spreads required for publicly traded bonds issued by comparably rated insurers. The carrying amount for all other deposit-type contracts approximates fair value.
- Derivative Cash Collateral — Comprised of U.S. Direct Obligation/Full Faith and Credit Exempt money market instruments, commercial paper, cash, and all highly-liquid debt securities purchased with an original maturity of less than three months. The money market instruments are valued using unadjusted quoted prices in active markets that are accessible for identical assets and are primarily classified as Level 1. If public quotations are not available for commercial paper or debt securities, because of the highly-liquid nature of these assets, the carrying amount may be used to approximate fair value.
- Borrowings — Fair values of long-term FHLB borrowings are estimated by discounting expected future cash flows using current interest rates for debt with comparable terms. Fair values of other borrowings are deemed to be the same as the carrying values.

D. Not Practicable to Estimate Fair Value

Type or Class of Financial Instrument	Carrying Value	Effective Interest Rate	Maturity Date	Explanation
Preferred stocks	\$ 132,254,227	0.000%		It is not practicable to measure the fair value in certain private preferred stock.
Common stocks - unaffiliated	9,661,100	0.000%		It is not practicable to measure the fair value when using the equity method and when measuring fair value in certain private common stock.
Contract loans	226,098,793	6.06%		Contract loans are often repaid by reducing policy benefits and due to their variable maturity dates.

F. Subprime Mortgage Related Risk Exposure

- (1) The Company has chosen to categorize all non-prime mortgage risk, Alt-A mortgage risk, as sub-prime mortgage risk. Several different characteristics of the underlying mortgage loan pool are considered when classifying whether an investment in a security should be deemed an investment with sub-prime mortgage related risk. The first characteristic considered is the average credit rating (FICO score) of the mortgage loan obligors or the percentage of obligors with a credit rating below a certain threshold. The next characteristic reviewed is interest rate on the mortgage loan. For fixed rate loans, the average loan rate on the mortgage loan is compared to benchmark interest rates at origination of the loan. For adjustable rate mortgages, the size of the gross margin over the benchmark rate, the use of low fixed and introductory rates, and the average maximum rate are taken into consideration when determining whether a pool of mortgage loans should be classified as sub-prime. In addition, a mortgage pool may be considered sub-prime if a meaningful percentage of the mortgage loans were originated using underwriting standards that did not verify income or asset levels, or a meaningful percentage of the mortgage loans have loan-to-value ratios over 80%. Even if a majority of the obligors in the mortgage pool had high credit scores, a security is considered to have sub-prime mortgage related risk exposure if a mortgage pool had other sub-prime mortgage related characteristics. Also, when the security is insured by a monoline insurer, the security is considered a sub-prime exposure based on the underlying mortgage loan characteristics.

Unrealized losses in securities with sub-prime exposure stem from changes in amount and/or timing of projected future losses. There are no realized losses due to cash flow shortfalls related to sub-prime securities.

Risk exposure is managed by investing only in high-quality assets with structural credit enhancements. The Company qualitatively assesses the market environment and underwriting quality of underlying mortgage pools. Due to a perception of declining underwriting quality in mortgage-backed transactions, the purchase of such securities with sub-prime exposure was eliminated during the first half of 2004. Risk exposure is further managed by limiting sub-prime sector holdings to a “de minimis” level relative to total assets (less than 1%), eliminating the risk of forced sales to meet cash flow needs.

- (3) Direct exposure through other investments.
